CONCEPTUAL CHICAGO OVERWATCH LEAGUE TEAM

It's a bit nuts that Chicago doesn't have an Overwatch League team, isn't it? I mean, Atlanta and Toronto have one. LA has *two*. I tried to visualize what a Windy City team would look like.

Originally sent to Blizzard for an internship application.

COMMISSIONED DESIGN

I was commissioned to make a coaster for the developer of an iconic building in Chicago (highlighted by the radial sunrays). The theme was *Art Deco*.

COMMISSIONED LOGO DESIGN

I was asked to create a logo for an upcoming barn-themed wedding venue in Wisconsin.

MAIN LOGO

SUB LOGO

After rounds of revisions, the client chose the above two.

LOGO DESIGN

The left side is a logo I created for my podcast, The High Ground, based on the *true sight* ability in the Valve's Dota 2.

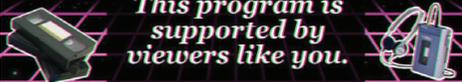

Above is a logo for a friend's conceptual esports organization.

TYPOGRAPHIC DESIGN

Alle Menschen sind frei und gleich an Würde und Rechten geboren. Sie sind mit Vernunft und Gewissen begabt und sollen einander im Geiste der Brüderlichkeit begegnen.

Jeder hat Anspruch auf alle in dieser Erklärung verkündeten Rechte und Freiheiten, ohne irgendeinen Unterschied, etwa nach Rasse, Hautfarbe, Geschlecht, Sprache, Religion, politischer oder sonstiger Anschauung, nationaler oder sozialer Herkunft, Vermögen, Geburt oder sonstigem Stand. Des weiteren darf kein Unterschied gemacht werden auf Grund der politischen, rechtlichen oder internationalen Stellung des Landes oder Gebietes, dem eine Person angehört, gleichgültig ob dieses unabhängig ist, unter Treuhandschaft steht, keine Selbstregierung besitzt oder sonst in seiner Souveränität eingeschränkt ist.

I love typography, and something about the German script is just darn cool. This is a geometrical font I made, based on the script Germany abandoned 100 years ago.

To the left is a sample, in German, written in the font. Below is the font on one of my favorite restaurants.

FAKING A VIDEO GAME LEAK

This isn't the usual thing I'd put in my portfolio, but it gave me some of the most theatrical testimonies on my design skill I've ever had.

In August of 2017, I faked a leak from Valve Software's video game, *Artifact*, by designing a concept for a long-awaited element of the game that hadn't been released.

Then, I took a grainy picture of it and I put it anonymously on the internet.

My card design was picked up by SteamDB, an unofficial Steam stats site with 62K followers.

We haven't been able to confirm its legitimacy, but here's a possible look at a hero card in [@PlayArtifact](#).

this is a good photoshop... like really good, who would think the fake the 3D perspective on the card?

I actually think it might be real...

It was posted to reddit, which spawned a heated debate.

Finally, a former Valve employee had to debunk it for the world.
